

Maintenance Schedule under Normal Driving Conditions

NOTE:

- The intervals should be determined based on odometer readings or months, whichever comes first.
- The following table shows the service schedule up to 90,000 km (54,000 miles). Beyond 90,000 km (54,000 miles), perform the same maintenance services at the same intervals shown in the table.
- This table shows the typical maintenance schedule.
The actual maintenance schedule, however, varies depending on vehicle specifications, so the typical maintenance schedule may not be applicable to some models.
Therefore, for the maintenance schedule that is specifically applicable to the vehicle being serviced, follow the relevant instructions in the "Periodic Maintenance Schedule" under "INSPECTION AND MAINTENANCE" section of the Owner's Manual.
